

Noise Study Results

Day-Night Average Sound Level (DNL) Contours at Outlying Landing Field (OLF) Coupeville

OLF Coupeville

- The “C” scenario for each alternative would have the least increase in population within the 65 decibel (dB) DNL noise contour.
- The “A” scenario for each alternative would have the greatest increase in population within the 65 dB DNL noise contour.

Estimated Population within the 65 dB DNL Noise Contour at OLF Coupeville

No Action	Alternatives/ Scenarios		Difference
2,316	1A	3,632	+1,316
	1B	3,255	+939
	1C	2,851	+535
	2A	3,572	+1,256
	2B	3,200	+884
	2C	2,828	+512
	3A	3,600	+1,284
	3B	3,237	+921
	3C	2,842	+526
